

# Diversified Images, Inc.

LOCATION: Valencia, CA

**OTHER INFO:** Diversified Images was established in 1966. Today, we continue to be a leader of high quality screen printing, laser engraving, electro-chemical etching, digital graphics and component marking for commercial, electronic, military and industrial applications. From our 16,000 sq. ft. facility we produce high quality, graphic overlays, nameplates, dials, panels, chassis, and decals and direct to product identification for all industries. For more information, please visit [www.DiversifiedImages.com](http://www.DiversifiedImages.com).

**1 LASER MARKING AND LASER ENGRAVING...**our specialty is marking or engraving high-end industrial components. In addition, we provide screen printing, electro-chemical etching, pad printing and machine engraving for applying product identification.

**2 DECALS AND LABELS...** polyester, vinyl, aluminum foils and lexan are but a few of the materials that Diversified Images uses in printing quality decals and labels. When a client has a need for tracking or tracing our bar code labels make sure their products get read. With consecutive numbering, IUID data matrix or additional graphics we cover it all.

**3 NAMEPLATES, DIALS & DATA PLATES...**Used in a wide variety of applications; such as equipment rating output, faceplates, wiring schematics or calibration information. Our products are produced using quality screen printing, selective anodizing or metal photo processes focusing on military, aerospace and industrial applications.

**4 CONNECTORS AND COMPONENTS...** Since our inception, one of our specialties has been screen printing high-end electronic connectors and components with a specialty in marking silicone rubber materials. All of our methods meet or exceed industry standards.

**5 MEMBRANE SWITCHES, OVERLAYS and KEYPADS...** engineered to create an efficient, high-quality switch; all switches undergo 100% electrical testing ensuring a reliable product using overlay materials for the most durable requirements. Multi-colors, clear view windows and ultra-violet texture coatings are but a few of the options available.

**6 OUR BUILDING...**From our 16,000 sq. ft. facility in Valencia, California, we Diversified Images and our outstanding staff has been assisting our customers with their product identification requirements since 1966.
